SUMMARY

Python Developer and Machine Learning enthusiast with strong fundamentals in Python programming and core ML concepts. Skilled in building efficient code and exploring data-driven solutions. Also experienced in frontend design, bringing a blend of technical and creative skills. Completed a 3-month internship and actively seeking entry-level opportunities as a Python Developer or Machine Learning Engineer to apply and grow technical expertise

WORK EXPERIENCE

Python & Machine Learning Engineer Intern GeekTheory

April 2026 – July 2026

- Worked as a Python and Machine Learning Engineer Intern for 3 months.
- Developed ML models using Pandas, NumPy, and Scikit-learn on APIs, databases, and web data.
- Performed data preprocessing, feature engineering, hyperparameter tuning, and model optimization.
- Implemented web scraping for multi-source dataset collection.
- Collaborated on end-to-end ML pipeline development.

PROJECTS

JobSkills - Job Scraper

Built a full-stack AI platform (Next.js, FastAPI, Supabase) that automatically scrapes jobs and matches them to user resumes. Engineered a zero-downtime AI Router combining NVIDIA, Cohere, and Groq to bypass API rate limits. Designed a scalable background queue for real-time processing and automated database cleanups.

RAGchatBot – Document Q&A Chatbot

Built a full-stack Retrieval-Augmented Generation (RAG) chatbot that allows users to upload documents (PDF, DOCX, images) and ask questions based on the content. Implemented smart text extraction with OCR fallback, vector embeddings using ChromaDB, and response generation via Gemini API. Tech Stack: Python, FastAPI, ChromaDB, MongoDB, Next.js, Tesseract OCR.

VaultNominee – Digital Legacy Vault

Full-stack secure vault application with AES-256 encryption and Dead Man's Switch. Features: Nominee management, JWT authentication, secure file upload, and PWA support. Tech: Node.js, Express, MySQL, JavaScript, bcrypt.

EDUCATION

2022 - 2026	B.tech (Computer Science) at SGSITS (Ujjain)	(GPA: 6.3/10.0)
2022	Class 12th MP Board	(Grades B)
2020	Class 10th Some Board	(Grades A)

SKILLS

Machine Learning	Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Scikit-learn, Pandas, NumPy
Frontend Designer	HTML5, CSS3, Bootstrap, Vanilla JavaScript, React.js, jQuery, Responsive Web Design.
Backend Developer	Python, OOP, FastAPI, RESTful APIs.
DataBase	MySQL, MongoDB.
Data Analytics	Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Pandas, NumPy, Matplotlib, Seaborn
Tools	Git, GitHub.
